

THE IUE NASA USERS' COMMITTEE

The purpose of the Users' Committee is to represent the interests of scientists observing with the NASA IUE facilities. The committee meets twice yearly, usually in March and September, to review the status of the satellite and to advise the Project Scientist on policy matters affecting the scientific aspects of its operation. The meetings are held at the Goddard Space Flight Center and are open to anyone who wishes to attend. The exact dates and agenda for each meeting are available on request about a month before the meeting.

IUE Users should always feel free to discuss their problems or concerns with the Project Scientist or members of the Project staff. In addition, however, the members of the Users' Committee are prepared to discuss problems with Users, particularly on matters of policy or subjects of general concern. Members' terms are staggered so that two new members are elected at each meeting, based on nominations received from the Users-at-large. You are encouraged to nominate for membership individuals whom you believe would help us make the project productive and responsive to the needs of the Users. Nominations may be submitted informally at any time to the Project Scientist or to any other member of the Committee. The present membership of the Committee is listed below in order of seniority.

Membership Ends

Fall, 1980	Arthur L. Lane Blair D. Savage
Spring, 1981	Yoji Kondo Theodore P. Snow
Fall, 1981	George H. Herbig Richard F. Green
Spring, 1982	Nancy D. Morrison Robert F. Wing
Fall, 1982	Paul D. Feldman Lee W. Hartmann
Ex-Officio	Albert Boggess Donald K. West
