

Eighth Episode IUE Proposal Instruction Packages

The revised instruction package for eighth episode IUE observational and archival research proposals will be available in July, 1984. Proposals received by October 26, 1984 will be included in this year's peer review cycle and will be considered for support during the IUE episode running from April, 1985 through March, 1986.

Prospective proposers should obtain a new instruction package for use in preparing their proposals as older packages will be incomplete or obsolete in describing IUE Observatory capabilities or requirements for proposal content or format.

Eighth episode packages will be mailed automatically to individuals in at least one of the following groups:

- o individuals who proposed as Principal Investigators for the sixth episode (April '83 - March '84) or the seventh episode (April '84 - March '85)
- o individuals who wrote last year to request seventh episode instruction packages.

Persons included above who do not receive a package by the end of July, and all other interested parties should request one by writing:
