

NASA IUE REPRINTS

(Received since Newsletter No. 23)

- "The Discovery of S₂ in Comet Iras-Araki-Alcock 1983d"
M.F. A'Hearn, P.D. Feldman, and D.G. Schleicher,
Ap.J., 274, L99-L103, 1983 November 15
- "Outer Atmospheres of Cool Stars. XV. High-Dispersion Ultraviolet Studies of Active Chromosphere G-K Dwarfs", T.R. Ayres, et al.,
Ap.J., 274, 784-793, 1983 November 15 ,
- "Redshifts of High-Temperature Emission Lines in the Far-Ultraviolet Spectra of Late-Type Stars, T.R. Ayres, et al.,
Ap.J., 274, 801, 1983
- "Spectrophotometric Observations of Symbiotic Stars and Related Objects",
W.P. Blair, et al., Ap.J. Suppl. Ser., 53, 573-590, 1983 November
- "Rotational Modulation of the Chromospheric Activity in χ^1 Orionis (GO V)",
A.M. Boesgaard and T. Simon, Ap.J., 277, 241-249 1984 February 1
- "Images in the Rocket Ultraviolet: The Starburst in the Nucleus of M83",
R.C. Bohlin, et al., Ap.J., 274, L53-L56, 1983 November 15
- "Chromospheres, Transition Regions, and Coronas",
E. Bohm-Vitense, Science, 223, 777, 1984
- "Ultraviolet Studies of O and B Stars in the LMC Cluster NGC 2100, the SMC Cluster NGC 330 and the Galactic Cluster NGC 6530",
E. Bohm-Vitense and P. Hodge, S. van den Bergh and K.S. de Boer (eds.)
in "Structure and Evolution of the Magellanic Clouds, 59, 1984.
- "Multifrequency Observations of the BL Lacertae Object 0735+178",
J.N. Bregman, et al., Ap.J., 276, 454-465, 1984 January 15
- "IUE Observations of the Low-Excitation Planetary Nebula Tc-1",
W.A. Feibelman, P.A.S.P., 95, #573, 1983
- "Ultraviolet Observations of M1-2 (=VV 8)",
W.A. Feibelman, Ap.J., 275 628-635, 1983 December
- "Multifrequency Observations of the Flaring Quasar 1156+295",
A.E. Glasgold, et al., Ap.J., 174, 101-112 1983 November 1
- "The Remarkable Ultraviolet Spectrum of the Planetary Nebula Abell 30",
J.P. Harrington and W.A. Feibelman, Ap.J. 277 716-724, 1984 February 15
- "Einstein and IUE Observations of Nearby Red Dwarfs",
H.M. Johnson, P.B. Byrne and M. Rodono (eds.) Activity in Red-Dwarf Stars, 109-124, D. Reidel Publ. Co., 1983

- "Observations of Two Peculiar Emission Objects in the Large Magellanic Cloud", M. Kafatos, Ap.J., 275, 584-591, 1983 December 15
- "Variable Ultraviolet Emission in SY Muscae, A.G. Michalitsianos and M. Kafatos, Mon. Not. R. Astr. Soc. (1984) 207, 575-583
- "IUE Spectrum of the IO Torus: Identification of the $^5S_{2+3}P_{2,1}$ Transition of S III", H.W. Moos, et al., Ap. J., 275, L19-L23, 1983 December 1
- "Ultraviolet and Optical Studies of Binaries with Luminous Cool Primaries and Hot Companions. III. Reticon Radial Velocities", S.B. Parsons, Ap. J. Suppl. Ser., 53, 553-572, 1983 November
- "Far-Ultraviolet Emission Lines in U Cephei: Evidence for a Hot, Turbulent Circumstellar Envelope", M.J. Plavec, Ap.J., 275, 251-270, 1983 December 1
- "Interacting Binary Stars: Freaks or Rosetta Stones?", M.J. Plavec, J. Roy. Astron. Soc. Can., 77, p. 283, 1983
- "Simultaneous IUE and Ground-Based Observations of V 923 Aquilae", A.E. Ringuelet, et al., Astron. Astrophys., 131, 9-19 (1984)
- "The Resonance Lines of Aluminum in IUE Spectra of B-Type Chemically Peculiar Stars", K. Sadakane, M. Takada, and J. Jugaku, Ap.J., 274, 261-269, 1983 November 1
- "Comments on the Ultraviolet Spectrum of γ^2 Velorum", J. Sahade, Y. Kondo, and G. McCluskey, Jr., Ap.J. 276, 281-285, 1984 January 1
- "LSS 4300: A Hot Counterpart of Upsilon Sagittarii and KS Persei?", D. Schonberner and J.S. Drilling, The Astrophysical Journal, 276, 229-232, 1984 January 1
- "Ultraviolet Spectroscopy of Hot Young Stars with Infrared Excesses: NGC 2264-W46, W90, and W100", M.L. Sitko, T. Simon, and M.R. Meade, PASP, 96, No. 575,, January 1984
- "IUE Observations of Longitudinal and Temporal Variations in the Jovian Auroral Emission", T.E. Skinner, et al., Ap.J., 278, 441-448, 1984 March 1
- "Variability of the Ultraviolet Spectrum of BL Lacertae Objects", M.H. Ulrich et al., Ap.J., 276, 466-471, 1984 January 15
