

ERRATUM: "AVAILABILITY OF *IUE* NASA AND ESA SPECTRAL ATLASES ON MAGNETIC TAPE"

[*IUE NASA Newsletter* No. 24, 9 (1984 June)].

Although the flux tables published in the *IUE Low-Dispersion Spectra Reference Atlas, Part 1. Normal Stars* (Heck *et al.* 1984, ESA SP-1052) present data in 5-Å steps, as pointed out on page 8 of the publication, the plots and the magnetic tape version contain data in 2-Å steps. This fact was inadvertently omitted from my article and may be of significance to potential users of the *Atlas*. I apologize for this oversight and thank Andre Heck for pointing it out.

Wayne H. Warren Jr.
