IUE DOCUMENTS AVAILABLE

The IUE Project has available to interested astronomers a number of useful documents. A list of these documents is given below. Please note that we generally have a number of copies of the more recent NASA IUE Newsletters available, but only a few copies of some of the older issues are available in printed form. The NSSDC has available all back issues of the newsletters on microfiche.

Please feel free to request any of these for yourself, your students, or co-workers. In addition, I will be happy to answer questions and seek out any additional information that you need.
