

IUE ANNUAL MERGED LOG

The IUE Observatory has generated its annual merged log of observations for use by our Guest Observers. The log includes descriptions of all Goddard and VILSPA observations through May 31, 1989. It is available in two sorts, one by right ascension and the other by IUE object code. The time of observation sort has been dropped from general distribution since GOs generally do not find it useful.

The log is being distributed in microfiche form with IUE thirteenth-episode observing proposal packages. This year we are not distributing copies with the newsletters, due to the prohibitive effort required to make and handle 1000 microfiche copies. If you have not received a set of merged log microfiches and would like one, please call the IUE secretary Ms. Mona Drexler at (301) 286-7664, or contact me at (301) 286-5749 or IUESOC::IMHOFF on SPAN.

The log is available on-line at the IUE Regional Data Analysis Facilities. Please contact either Mr. Randy Thompson at the GSFC RDAF (301-286-8800 or IUE::RTHOMPSON on SPAN) or Dr. Ed Brugel at CU RDAF (303-492-4054 or CYGNUS::BRUGEL on SPAN) for information.

A tape version of the log is available through the National Space Science Data Center. Please contact Ms. Charleen Perry (301-286-2899 or NSSDCA::PERRY on SPAN) for information.

Printed copies of the merged log are available for consultation at the IUE Observatory. These are too bulky for general distribution. However, outdated copies are placed in the GO office for whomever is willing to lug them home!

Cathy Imhoff
