IUE SYMPOSIA

Recently two symposia have been held commemorating the completion of IUE's second year of scientific operation. ESA and the Astronomical Institute at Tübingen jointly sponsored The Second European IUE Conference, held at Tübingen on March 26-28. NASA sponsored The Universe at Ultraviolet Wavelengths: The First Two Years of IUE, which was held at the Goddard Space Flight Center on May 7-9. Both meetings were very successful and included papers with many interesting new results. For the benefit of those who were unable to attend one or both of the symposia, the programs of both meetings are reproduced in the following pages.

Proceedings are to be published later this year for both meetings. The proceedings of the Tübingen meeting will become available from:
