ERRATUM: "AVAILABILITY OF IUE NASA AND ESA SPECTRAL ATLASES ON MAGNETIC TAPE"

[IUE NASA Newsletter No. 24, 9 (1984 June)].

Although the flux tables published in the IUE Low-Dispersion Spectra Reference Atlas, Part 1. Normal Stars (Heck et al., 1984, ESA SP-1052) present data in 5-A steps, as pointed out on page 8 of the publication, the plots and the magnetic tape version contain data in 2-A steps. This fact was inadvertently omitted from my article and may be of significance to potential users of the Atlas. I apologize for this oversight and thank Andre Heck for pointing it out.

Wayne H. Warren Jr.
