

IUE Observatory Schedule

Normal IUE operations were suspended August 17 because of the gyro failure. As science operations again became possible, the August and September schedules were reorganized to accommodate previously scheduled time-critical observations and make the best use of available spacecraft time. The list below summarizes the science operations which were performed, including the date, Principal Investigator, program identification code, and the duration of the observations. Shift times varied throughout this period because of various operational constraints. The time spent in spacecraft testing and calibration is not itemized.

Normal 24-hour per day science operations were resumed on October 1, 1985. The previously issued October and November schedules were retained as far as possible. October, November, December, 1985, and January, 1986, schedules are presented below in the usual format.

Nancy R. Evans

IUE Science Operations: Aug. 17 - Sept. 30, 1985

| <u>Date</u> | <u>GO</u> | <u>ID</u> | <u>Hours Used</u> |
|-------------|-----------|-----------|-------------------|
| Aug. 30 | A'Hearn | SCHMA | 8 |
| Sept. 3 | Moos | SUHHM | 8 |
| Sept. 4 | A'Hearn | SCHMA | 8 |
| Sept. 5 | Ake | OD73K | 8 |
| Sept. 6 | Kondo | BLHYK | 4 |
