

YET MORE IUE DOCUMENTS AVAILABLE

Our last notice offering IUE document to interested astronomers was so popular that we are reissuing it, with some additions to the list. For your convenience the available documents are listed below. Please note that we generally have a number of copies of the more recent NASA IUE Newsletters available, but only a few copies of some of the older issues in printed form. All back issues of the newsletters are available on microfiche. The NASA IUE Symposium Future of Ultraviolet Astronomy (CP-2349) is no longer available.

Please feel free to request any of these documents for yourself, your students, or co-workers. In addition, we will be happy to answer questions and seek out any additional information that you need.
